

EOD / IEDD Power Cartridges

The IEDD disruptor and EOD render safe tools are mostly powered by electrically initiated power cartridges. We supply a variety of EOD cartridges. Cartridge undergo a well defined qualification process under MIL-D-21625. These are certified for performance, safety and reliability. Each lot of the cartridges is proof tested before final release to the customer. Cartridges are secured in an aluminum container and finally packed in sealed ammunition container.

We also offer to address any specialized cartridges design needs for EOD/IEDD equipment and can provide a cost effective solution.

Safety specifications

- No Fire Current 0.7 A
- All Fire Current 1.35 A
- Hazard Class: 1.4 S

EOD cartridge CT26A. The cartridge CT26A are used with EAD-26 disruptor or the Pigstick disruptors of UK origins. The cartridge is supplied with 1x piston and 1x closure cap. The cartridge can also be used with disruptors with barrel bore upto 26 mm like our EAD-26 or the old Pigstick disruptors.

EOD Cartridge CT05W. The cartridge CT05W is a 0.5 inch EOD cartridge used with different EOD kits like De armer, Recoiless distupor EAD-50 and the Rocket Wrench.

EOD Cartridge CT05D

The CT05E is a 0.5 inch Cartidge widely used with EOD and IEDD equipment. It is used with Recoiless distupor EAD-50 De armer / Disruptors. The cartridges are produced in lots and each lot undergoes comprehensive lot acceptance testing to ensure correct and consistent performance. The cartridges are supplied in enviromentally sealed containers for a log life during storage.

EOD Cartridge CT20. The cartidge CT20 is a 20mm cartridge used with Recoiless distupor EAD-20. The cartridge is provided with teflon cap installed on the front end which provides a seal when water is filled inside the disruptor.
