

## EOD / IEDD Power Cartridge CT05W

The IEDD disruptor and EOD render safe tools are mostly powered by electrically initiated power cartridges. We supply a variety of EOD cartridges. These cartridges undergo a well-defined qualification process under MIL-D-21625. These are certified for performance, safety and reliability. Each lot of the cartridges is proof tested before final release to the customer. Cartridges are secured in an aluminum container and finally packed in sealed ammunition container secured by the polystyrene slots.

The cartridge CT05W is a 0.5-inch EOD cartridge used with different EOD kits like De armer, Recoiless disruptor EAD-50 and the Rocket Wrench.
