

# B-1 Maintenance Platform

The B-1 maintenance platform is a portable, variable height platform. It provides a cost effective solution for working at heights up to 18 feet above the floor. These help to inspect, and perform the maintenance of everything from structure, engines and electrical systems within its height range. With the aircraft maintenance, it can also be used as temporary access stairways during construction work. The platform is raised and lowered by a manual pump and hydraulic actuator. We can also customize the B1 Aircraft Maintenance Platform to your Special purpose needs.

- 500 pound capacity.
- Non-slip, self-cleaning steps and platform floor.
- Double acting hydraulic hand pump with mechanical safety.
- Heavy-duty casters and 16" pneumatic tires make it easy to move.
- Inclining Stairway - base, stairs and platform stay parallel at any height position
- All-steel, welded construction.
- 4 leveling jacks, dual two speed pump, 2 wheel parking breaks.
- Hinged Drawbar.
- NSN 1730-00-390-5618.

Platform Height	Platform Size	Base Dimensions (W x L)	Steps	Weight	Load Capacity
3' to 12'	4'x4' Other sizes can be offered	6' x 17'	9	1560 Lbs	500 lbs
