

Detonating Cord

Detonating cord consists of PETN core covered by woven tube of polythene tape and cotton threads protected by an outer PVC insulation. The weight of cord is approximately 10 g/m and outer diameter is about 5.0 – 5.5mm. The Cord is a strong, Flexible and linear explosive. It is cap sensitive product having the ability to initiate all cap sensitive explosives & primers.

Tensile strength	60kg/6 inches	Water Immersion Test	03 meter depth for 24h
VOD	6000 - 7000 m/Sec	Gramage	10 +1 g/m

Detonation Cord Connector

Detonation Cord connectors are a useful consumable for reliable connections of the Detonation cord. It makes the demolition operations easy to setup the demolition pit.
