

Recoiling Water Disruptors EAD-26 and EAD-40

EAD-26 and EAD-40 are disruptors with recoil and are designed as a means of disrupting IEDs. There is a high probability of avoiding a detonation or explosion of an IED on its deployment. These are light weight and medium caliber disruptors capable of being fired remotely. The complete disruptor is constructed with high strength stainless steel. The complete disruptor with its stand and accessories are supplied in a strong Cardura outer pack with carrying straps.

Breech with safety pin. Disruptor breech is upgraded from the older Pigstick version that it has a safety pin to keep the terminals short and the cartridge is connected just when it has been deployed. This enables a bomb technician to set up the disruptor at the incident control point and spending minimum time at an IED.

Injector Barrel

Injector barrels with fluid capacity of 0.1/0.2 liters (260- 485 mm length) can be supplied. Barrels are specially treated to have a long life. Barrel length can be changed on customer requirement.

Stand

The stand is multi position with counter weight. The hinges contain friction washers and spring loaded nylon insert to receive the barrel. The disruptor can be deployed to heights of more than 1050 mm.

Kit complete

	EAD-26	EAD-40
Nominal Bore Diameter	26.5 mm	40 mm
Disruptor Overall Length	485 mm	465 mm
Complete Kit Weight	4 Kg	5.5 kg
Disruptor Complete Weight	2.9Kg	3.5 kg
Pigstick Adjustable Stand	7 Kg	7 Kg
Water filling capacity	100 ml	200 ml
Kit components	1 x Barrel 1 x Breech module, 1 x Water Bottle, 2 x safety pins, 1 x Small Arms cleaning Brush, 1 x Screw Driver, 1 x Tool Loading Injector, 2 x Ln Key, 1 x Adapter, , 2 x Cleaning Brush Wool, 2 x Safety pin, 1 x Cleaning brush steel, 1 x Transit case fabric, 1 x Cleaning Brush Nylon, 1 x Multi position Stand, 1 x Rod for cleaning brush
