

# 60MM & 81MM MORTARS

Mortars serve as portable infantry platoon patrol weapons capable of launching high explosive, smoke, or illuminating shells. Their portability allows for engagement of distant targets, making them versatile in various terrains. Leveraging high trajectory firing, mortars prove especially effective in challenging landscapes.

## 60mm Light Mortar:

- A valuable support weapon for short and medium-range targets
- Easy to use and dependable in all weather conditions
- Provides close-in support for ground troops
- Compatible with all qualified 60mm ammunition types for operations

## 81mm Mortar:

- An effective support weapon for short, medium, and extended range targets
- User-friendly, featuring a smooth bore and muzzle loading for reliability in any weather
- Compatible with all qualified 81mm ammunition types for operations
- Disassembled into three loads (barrel, base plate, and bipod) for swift transport
